

L'ingegno di Leonardo: le macchine. Build a rubber band car

TARGET AGE GROUP:

Primary school (IV and V years) and secondary school

OBJECTIVES:

Furthering the knowledge of the role and work of engineers in the Renaissance and especially Leonardo's inventions and studies of mechanics starting from projects and ideas collected in the famous codices.

FORM:

Visit to the exhibition "L'ingegno di Leonardo: le macchine" and then using simple materials and tools build a rubber band car that recalls to mind the crossbow machine whose project is in the Atlantic codex.

SUBJECTS INVOLVED: History, mechanics, physics

DURATION: 2 hours

Cost: €4,00 per person if undertaken at the Civic Museum.
